**■100W Phase/Triac Dimmable driver Mechanical Specification**

※ Input black(L) and white(N) wires to be connected AC, Green wire to be connected ground; output red and black wires to be connected led lighting.

**■ Real picture & Mechanical Specification of 100W Phase/Triac Dimmable Driver with junction box**

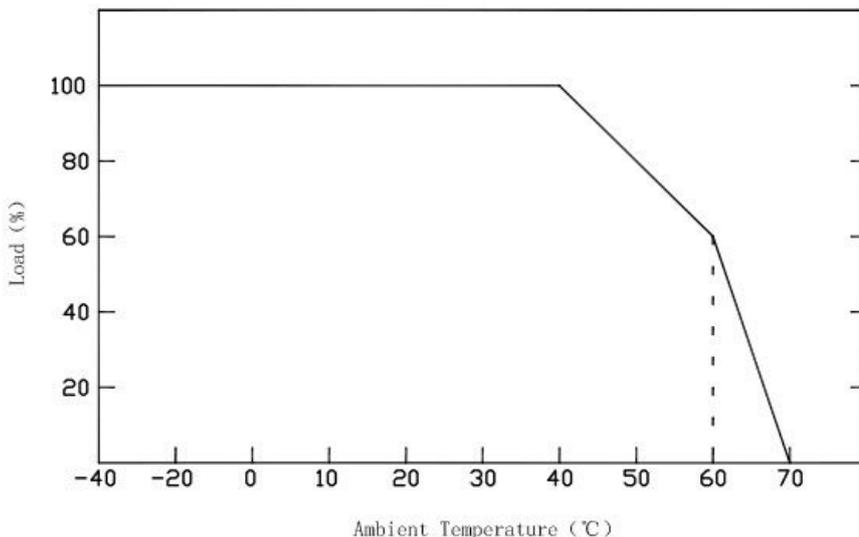

### ■Dimming Operation

- ※The Pulse-Width Modulation (PWM) of output voltage can be adjusted through input terminal of the AC phase line(L) by connection a phase/triac dimmer.
- ※Usually matching with Forward phase , leading edge , Magnetic low voltage triac dimmers, (or Reverse phase, trailing edge ,Electric low voltage, Triac Dimmers can be customized!)
- ※Please try to use dimmers with power at least 2.5 times as the output power of the driver.

### ■Warning

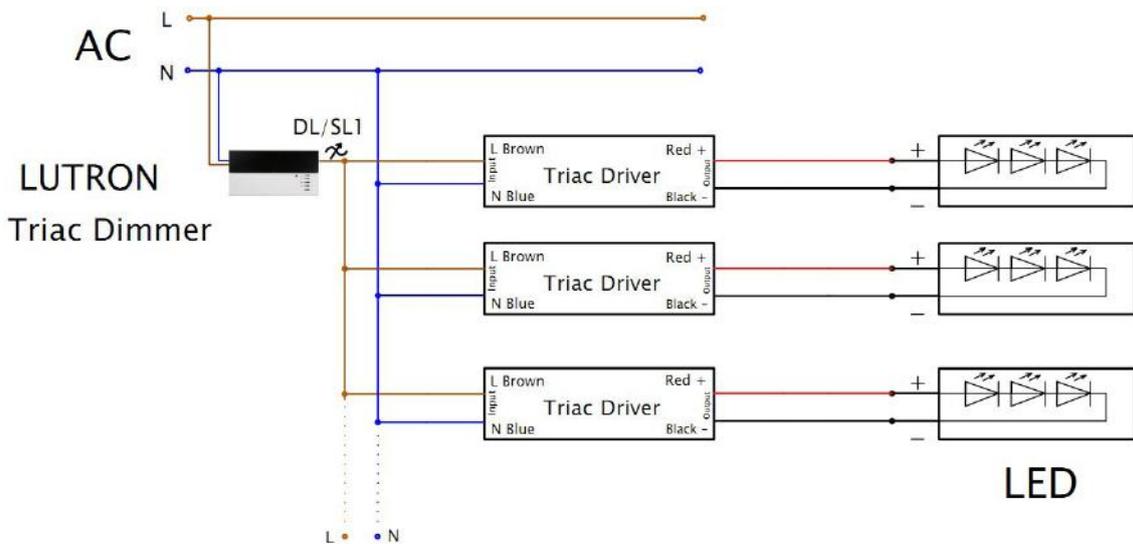

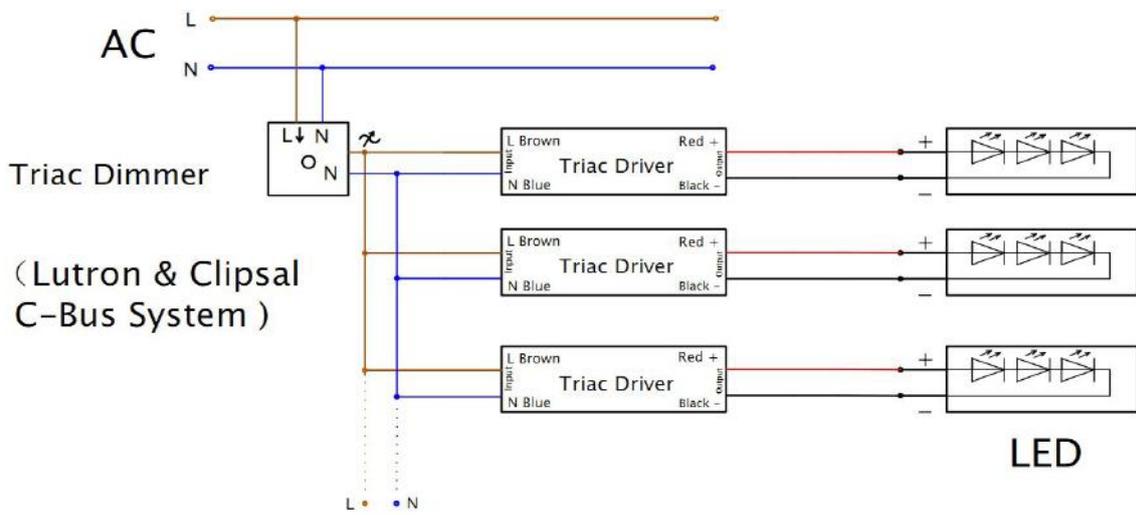

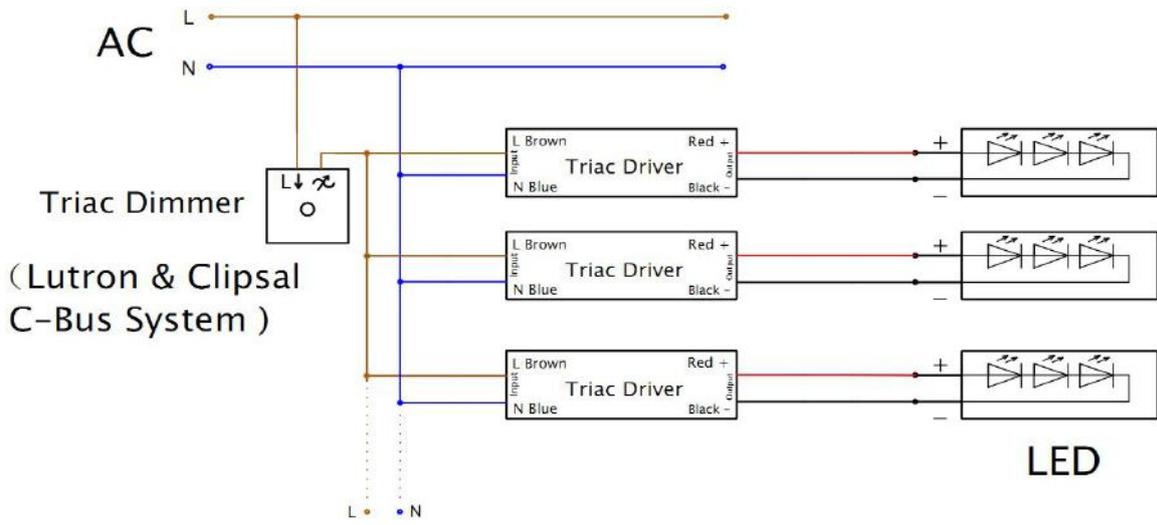

- ※Prevent to reverse polarity; Output polarity: RED "+"; BLACK "-"
- ※Risk of Electric Shock. When used outdoors, install only on a circuit protected by a Class A GFCI;
- ※Risk of Fire. Installation involves special wiring methods to run wiring through a building structure. Consult a qualified electrician;
- ※Risk of Electric Shock. Mount the unit at a height greater than 1 foot from the ground surface.

### ■Derating Curve

- ※To extend their life, please refer to the Derating Curve and derate according to the temperature.
